[Portfolio](#)

Cirebon, Indonesia

PROFILE

Bachelor's of Geodetic Engineering Universitas Diponegoro (2026) with internship experience in surveying, mapping, GIS, and remote sensing. Proficient in spatial data processing using ArcGIS, QGIS, AutoCAD, Google Earth Engine, ENVI, SNAP, and Agisoft Metashape, as well as data management and automation using Python (Geospatial), SQL, and PostGIS on PostgreSQL. Experienced in the use of field surveying instruments such as Total Station, Waterpass (Automatic Level), and GNSS. Detail-oriented and ready to contribute professionally in the engineer and geoscience field.

EDUCATIONS

Universitas Diponegoro

August 2022 – June 2026

- Bachelor's Degree in Geodetic Engineering (GPA 3.57/4.00)
- Relevant Coursework: Database Management System, Geographic Information Systems (GIS), Land Surveying/Terrestrial Survey, Remote Sensing, Photogrammetry, GNSS, Engineering Survey, Hydrographic Survey, and Cadastral Survey

EXPERIENCES

GIS Analyst Freelance

May 2026 – Present

Self-employed/Independent

- Completed 25+ geospatial projects, including thematic map production and technical consulting in geospatial fields for clients from academic and private sectors.

GIS Analyst Intern

June – August 2025

PT Multi Areal Planing Indonesia (MAPID)

- Conducted potential POI (Point of Interest) surveys across 9 cities in the Kedungsepur and Sarbagita metropolitan areas, collecting 500+ data points to update the company's spatial data catalog and support data management
- Assisted in downscaling building footprint data for 25 cities in Indonesia using Python Geospatial and extracted Land Surface Temperature (LST) data. Streamlining data processing through automated scripting to improve efficiency compared to manual workflows.
- Completed an individual project, "Spatial Analysis of Potential Employment Absorption Areas by District in Tasikmalaya City, 2024," analyzing 8 districts to identify areas with the highest potential for employment absorption.

Surveyor Intern

January – February 2025

ATR BPN Kota Cirebon

- Conducted land parcel surveys and prepared survey drawings/plans using AutoCAD for land certificate documentation.
- Performed verification and examination of 100+ land certificate documents and legal records to ensure accuracy and compliance with regulatory standards.

ORGANIZATION

HM Teknik Geodesi Universitas Diponegoro

November 2023 – December 2025

- Head of G-Fact Photography Club (2025). Organized 2 photography workshops and 2 photo hunting events for Geodetic Engineering students, including an innovative 3D modeling workshop using close-range photogrammetry techniques directly relevant to the geodesy curriculum.
- Led the secretariat team in organizing administrative processes for the Mikat Division, Departement Anniversary's event Dies Natalis celebration, and Geoversity Basketball Competition 2024, managing 90 letters and proposals over a 4-month committee period.
- Implemented a centralized recap system and structured jobdesc division per event, reducing letter processing time by 50% (from 2 days to 1 day), which helped the PR team secure 5 sponsors and attract 8 competing basket teams from across faculties at Universitas Diponegoro.

BEM Fakultas Teknik Universitas Diponegoro

January – December 2023

- Staff, Talent and Interest Division (Mikat), BEM FT UNDIP 2023. Responsible for media publications, including design and management of the official Instagram account for the Mikat Division, quality control (QC) for the Creative Media division of Engineering Festival 2023, and graphic designer for UKM EXPO FT UNDIP 2023 content.
- Successfully handled public relations and documentation for POR FT UNDIP 2023.

PROJECT AND RESEARCH

Pemodelan Geostatistik Konsentrasi NO₂ dan Pengaruhnya Terhadap Prevalensi ISPA Pada Pertengahan Tahun 2025 di Kota Semarang (2026)

Final Project – Universitas Diponegoro

- Developed a geostatistical model using the Random Forest-Spatio Temporal Kriging (RF-STK) algorithm to reconstruct missing pixel data across 181 satellite images/time series using Python, achieving 80.22% accuracy ($R^2 = 0.8022$) in gap-filling performance.
- Analyzed the influence of NO₂ spatial distribution on ARI (Acute Respiratory Infection) prevalence in Semarang City using the Geographically Temporal Weighted Regression (GTWR) method in R.

SKILLS

Technical Skills

- GIS, Geo-AI/Machine Learning (ArcGIS, QGIS, Python, PostGIS, PostgreSQL, SQL, and Relational Database Management)
- Terrestrial and Engineering Survey (Total Station, Waterpass/Automatic Level, GNSS, and AutoCAD)
- Remote Sensing (Google Earth Engine, ENVI, and SNAP)
- Photogrammetry and 3D Modeling (Agisoft Metashape, Global Mapper, and Trimble)
- Hydrographic Survey (MBES and SBES)

CERTIFICATIONS

TOEFL Prediction Test – Service English Unit (SEU) Universitas Diponegoro

April 2026

- Score 518

WebGIS Development Bootcamp – MAPID Academy

August – November 2025

- Certificate of Participation
